

Introducing INOVA CLOUD SECURITY ASSESSMENT

Safety first

Analysis of your organization's security posture, evaluating vulnerabilities, identify current M365 infrastructure threats with remediation recommendations.

With Inova Cloud Security Assessment, we take a four-phased approach to set your path forward

1

Planning

Identify current configuration improvement possibilities: Provide new and modern solutions to make your tenant and users more secure.

2

Advise

Define adequate policies: To prevent threats, you will get an insight into what to configure to upgrade your tenant's security.

3

Awareness

We give you a clear picture of your current security estate and create awareness about the different licensing options available for all the users.

4

Preventive

Zero-day advanced malware attacks: Options to configure Malware Filters to prevent your users from receiving software that may damage their devices.

Duration:

The approximate duration of this assessment is 5 business days
